ACCESSORIES: QUICK GUIDE / USER MANUAL

Thank you for purchasing this innovative UNONU device. The specifications in this document are subject to change without prior notice.

UNONU and the UNONU logo are registered trademarks of Swagtek, Inc. Other trademarks are property of their respective owners.

Charge for 24 hours before using.

Install SIM card /memory card.

Get to know your UNONU phone.

Connect your UNONU phone to a computer with a USB Cable (cable not included).

Copy music files from your computer to your UNONU phone.

FCC Statement
1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE:
This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
•Reorient or relocate the receiving antenna.
•Increase the separation between the equipment and receiver.
•Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
•Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement
Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are set of comprehensive guidelines and establish permitted levels of RF energy for general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones includes a set of measurement known as the Specific Absorption Rate, or SAR. The SAR limits set by the FCC is 1.6 W/kg. Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the

actual SAR level of the phone while operating can be well below the maximum value. This device has been designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Because a phone needs to be able to talk to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in an outdoor testing rig, at the ear and worn on the body as required by FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 1.25W/kg and when worn on the body as described in this user guide, is 0.21W/kg(below measurement office, among phone models, depending upon available accessories and FCC requirements), while there may be different one between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated in compliance with the FCC. This information is available on the website of the Federal Communications Commission. For more information on SAR information on this model phone, visit the website of the FCC and can be found under the "Device Grant" section of <http://www.fcc.gov/oet/ea/> after searching on FCC ID: C512822Z additional information on Specific Absorption Rate (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at <http://www.ctia.com>. In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watt/kg (body averaged over one gram of tissue). The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation
This device was tested for typical body-worn operations. To comply with all exposure requirements, a minimum separation distance of three must be maintained between the user's body and the handset, including the antenna. Through scientific studies, and under conditions used by the device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

Warranty Certificate
Name and Surname: _____
Serial Number: _____
UNONU warrants that this product will be free from defects in material and workmanship. This warranty does not cover the following: (1) Defects caused by the user's misuse or abuse of the product, (2) Defects caused by the user's use of the product in an environment that is not intended for use, (3) Defects caused by the user's use of the product in an environment that is not intended for use, (4) Defects caused by the user's use of the product in an environment that is not intended for use, (5) Defects caused by the user's use of the product in an environment that is not intended for use. This warranty is void if the product is used in an environment that is not intended for use. For additional information about the terms and conditions of UNONU's Limited Warranty or to file a warranty service claim, please visit the support website at www.unonumobile.com.
Carta de Garantía
Nombre y Apellido: _____
Número de Serie: _____
UNONU garantiza que este producto estará libre de defectos de material y mano de obra. Esta garantía no cubre lo siguiente: (1) Defectos causados por el uso indebido o abuso del producto por parte del usuario, (2) Defectos causados por el uso del producto en un entorno que no está diseñado para ser utilizado, (3) Defectos causados por el uso del producto en un entorno que no está diseñado para ser utilizado, (4) Defectos causados por el uso del producto en un entorno que no está diseñado para ser utilizado, (5) Defectos causados por el uso del producto en un entorno que no está diseñado para ser utilizado. Esta garantía es nula si el producto se utiliza en un entorno que no está diseñado para ser utilizado. Para obtener más información sobre los términos y condiciones de la garantía limitada de UNONU o para presentar una solicitud de servicio al cliente, visite el sitio web de soporte en www.unonumobile.com.
