■ Overview

Please read the following concise rules carefully. Nonobservance to the rules may lead to danger or violence of the laws. The user's manual gives details about the safety precautions.

■ Emergency call

Make sure the equipment is in the covered area of the network service and the calling function is activated. As per the specific requirements, press the key of finish to clear the screen and return to the standby state. Input the emergency call number (112) and press the call key.

■ Function Description

The phone is a perfect combination of humanized design and exquisite workmanship, the streamline and ingenious body is comfortable to hold. With streamline and ingenious frame, it feels comfortable to hold the mobile phone in your hand. It supports TXT electronic book, Blue-tooth, dual SIM cards with one standby, network camera, camera, FM and etc, It makes your work more convenient and your free time more fun with the combination of keyboard, florid colored screen, pleasant bells, cartoon head portrait for incoming calls, strong file management function (supporting T-FLASH card), fashionable camera function and long time tape recording function, music player, video player.

1. Introduction

Insert the SIM card and the battery

Ask your SIM card dealer whether he has provided SIM card service and the method of usage who may be service provider or other dealers, SIM card and its contacts are vulnerable to scratch or bending. Attention shall be attached when use, insert or take out the card.

■ **Inserting/taking out T-FLASH CARD**

Only use approved and compatible T-FLASH card applicable to the mobile phone. Approved memory card trade standard is applied; however, certain bands may not be completely compatible with the mobile phone. Using incompatible memory card may damage not only the card and the mobile, but also the data stored in the card.

■ **Charging the battery**

Check the model number of the charger before using it to charge the mobile, Only use approved battery, charger and accessories applicable to the specific mobile model. Using other types of battery, charger and accessories may violate the certification or warranty terms of the equipment and may result in danger, Refer to the dealer for supply of relative approved accessories.

■ **Startup and shutdown**

Press the key of power supply to start up or shut down the mobile phone, If it is prompted to input PIN or UPIN, please input the required password (shown as **** on the screen).

2. Function of main menu

■ **My favorite**

You can browse files and save files in the memory card.

■ **Contacts**

You may save the information of contacts including names and telephone numbers in the phonebook, which can save as much as 500 entries.

■ Games

Enter games for: Brick N Ball\Mini Fish\Need of Speed.

■ Call logs

Information, invites the menu→choosing if needing to check your communicating by phone
→ Communicate by phone center→ Communicate by phone taking notes→SIM card 1 communicates by phone recording/ SIM card 2 communicates by phone taking notes → SIM card 1/ SIM card 2 possessions telephone , SIM card 1/ SIM card 2 has not answered the phone , SIM card 1/ SIM card 2 already answers the phone or 2 already batches of SIM card 1/ SIM card telephone.

■ Messaging

You may select to send the finished message from SIM card 1 or SIM card 2.You may select multiple receivers to send the message to more than 1 person.

■ Multimedia

Enter multimedia for:Video Player \Image viewer \Audio Player\FM radio\Sound recorder.

■ Alarm

Set the time of alarm clock, ring signal, ring mode, alarm ring mode and interval between repeated alarm rings.

■ Settings

Enter settings for: Profiles\ Phone settings\ Display settings\ Security settings\call settings\network settings.

(Default password: 0000)

■ Audio Player

The music player is used to play music files in supported formats in the current player's list. You may view details of the music files and set the current music file as the ring signal for incoming call. You may connect the Bluetooth earphone to enjoy the music.

■ Organizer

Enter organizer for: Calendar\ Calculator\ Bluetooth\World clock\ Torch\Stopwatch\ Unit conversion\Ebook.

■ Internet

Enter Internet menu for: You can Input website, browse the web etc

■ JIVIAPP

Enter the jiviapp via the internet.

3. PC connect

■ USB

Use the T-Flash inserted in the mobile phone as U-Disk. You can transfer music, videos, games and other files form PC to the T-Flash by USB cable. Enjoy it anytime and anywhere.

4. Maintenance and service

Refer to the local dealer for supply of accessories. Hereafter are some precautions for usage of the accessories, Only use batteries, chargers and accessories approved by the manufacturer. Usage of other types of batteries, chargers and accessories may result in violence of the certification or warranty terms or even lead to danger, Keep the equipment dry, Don't keep the equipment in under cooled places; otherwise, when the temperature rises to normal, moisture may be generated within the equipment, resulting in damage of the circuit board. .Only use matched or approved antenna .

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used

in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined

by turning the equipment off and on, the user is encouraged to try to correct the interference by one

or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.624W/Kg and when worn on the body, as described in this user guide, is 0.444W/Kg(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements)..While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RFexposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: [O55184518](#) Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to

account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **15mm** must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
