### **Laboratories Introduction**

SIEMIC, headquartered in the heart of Silicon Valley, with superior facilities in US and Asia, is one of the leading independent testing and certification facilities providing customers with one-stop shop services for Compliance Testing and Global Certifications.

In addition to testing and certification, SIEMIC provides initial design reviews and compliance management throughout a project. Our extensive experience with China, Asia Pacific, North America, European, and International compliance requirements, assures the fastest, most cost effective way to attain regulatory compliance for the global markets.

### **Accreditations for Conformity Assessment**

### 4. Equipment under Test (EUT) Information

| Description of EUT: 4 | inch 3G Smart Phone |
|-----------------------|---------------------|
| •                     |                     |

Main Model: LOGIC X4G

Serial Model: iSWAG Alpha, UNONU X4G

Date EUT received: May 03, 2018

Test Date(s): May 03 to 20, 2018

Equipment Category: DSS

Antenna Gain: Bluetooth: -1dBi

Antenna Type: PIFA antenna

Type of Modulation: Bluetooth: GFSK,  $\pi$  /4DQPSK, 8DPSK

RF Operating Frequency (ies): Bluetooth: 2402-2480 MHz

Max. Output Power: -1.971dBm

Number of Channels: Bluetooth: 79CH

Port: USB Port, Earphone Port

| Test Report | 18070406-FCC-R2 |
|-------------|-----------------|
| Page        | 7 of 54         |

Adapter 1:

Model: A31A-050055U-US1

Input: AC100-240V~50/60Hz,0.2Amps

Output: DC 5.0V, 550mA

Adapter 2:

Model: A31A-050055U-US1

Input Power: Input: AC100-240V~50/60Hz,0.2Amps

Output: DC 5.0V, 550mA

Battery 1:

Spec: 3.8V, 1500mAh, 5.7Wh

Battery 2:

Spec: 3.8V, 1500mAh, 5.7Wh

Trade Name : LOGIC, iSWAG, UNONU

FCC ID: 055401618

| Test Report | 18070406-FCC-R2 |

### 5. Test Summary

The product was tested in accordance with the following specifications.

All testing has been performed according to below product classification:

| FCC Rules                    | Description of Test                 | Result     |
|------------------------------|-------------------------------------|------------|
| §15.203                      | Antenna Requirement                 | Compliance |
| §15.247(a)(1)                | Channel Separation                  | Compliance |
| §15.247(a)(1)                | 20 dB Bandwidth                     | Compliance |
| §15.247(b)(1)                | Peak Output Power                   | Compliance |
| §15.247(a)(1)(iii)           | Number of Hopping Channel           | Compliance |
| §15.247(a)(1)(iii)           | Time of Occupancy (Dwell Time)      | Compliance |
| §15.247(d)                   | Band Edge& Restricted Band          | Compliance |
| §15.207(a)                   | AC Line Conducted Emissions         | Compliance |
| §15.205, §15.209, §15.247(d) | Radiated Emissions& Restricted Band | Compliance |

#### **Measurement Uncertainty**

| Emissions   |   |               |  |  |
|---|---|---------------|--|--|
| Test Item   | Description   | Uncertainty   |  |  |
| Band Edge& Restricted  Band and Radiated  Emissions& Restricted  Band | Confidence level of approximately 95% (in the case where distributions are normal), with a coverage factor of 2 (for EUTs < 0.5m X 0.5m X 0.5m) | +5.6dB/-4.5dB |  |  |
| -   | -   | -             |  |  |

| Test Report | 18070406-FCC-R2 |
|-------------|-----------------|
| Page        | 9 of 54         |

#### 6. Measurements, Examination And Derived Results

#### 6.1 Antenna Requirement

#### **Applicable Standard**

According to § 15.203, an intentional radiator shall be designed to ensure that no antenna other than that furnished by the responsible party shall be used with the device. The use of a permanently attached antenna or of an antenna that uses a unique coupling to the intentional radiator shall be considered sufficient to comply with the provisions of this section. The manufacturer may design the unit so that a broken antenna can be replaced by the user, but the user of a standard antenna jack or electrical connector is prohibited. The structure and application of the EUT were analyzed to determine compliance with section §15.203 of the rules. §15.203 state that the subject device must meet the following criteria:

- a. Antenna must be permanently attached to the unit.
- b. Antenna must use a unique type of connector to attach to the EUT.

Unit must be professionally installed, and installer shall be responsible for verifying that the correct antenna is employed with the unit.

And according to FCC 47 CFR section 15.247 (b), if the transmitting antennas of directional gain greater than 6dBi are used, the power shall be reduced by the amount in dB that the directional gain of the antenna exceeds 6 dBi.

#### Antenna Connector Construction

The EUT has 2 antennas:

A permanently attached PIFA antenna for Bluetooth/BLE/WIF/GPS, the gain is -1dBi for Bluetooth/BLE, the gain is -1.5dBi for WIFI, the gain is 1dBi for GPS.

A permanently attached PIFA antenna for GSM/PCS/UMTS, the gain is -2dBi for GSM850, 0.5dBi for PCS1900, -3dBi for UMTS-FDD Band V, 0dBi for UMTS-FDD Band II.

The antenna meets up with the ANTENNA REQUIREMENT.

Result: Compliance.

## 6.7 Band Edge & Restricted Band

| Temperature          | 25°C         |
|----------------------|--------------|
| Relative Humidity    | 50%          |
| Atmospheric Pressure | 1008mbar     |
| Test date :          | May 08, 2018 |
| Tested By:           | Aaron Liang  |

### Requirement(s):

| Spec                   | Item  | Requirement   | Applicable |
|------------------------|---|---|------------|
| §15.247(a)<br>(1)(iii) | a)  | In any 100 kHz bandwidth outside the frequency band in which the spread spectrum or digitally modulated intentional radiator is operating, the radio frequency power that is produced by the intentional radiator shall be at least 20 dB below that in the 100 kHz bandwidth within the band that contains the highest level of the desired power, based on either an RF conducted or a radiated measurement, provided the transmitter demonstrates compliance with the peak conducted power limits. |            |
| Test Setup             | Ant. Tower  Support Units  Ground Plane  Test Receiver  |   |            |
| Test<br>Procedure      | The test follows FCC Public Notice DA 00-705 Measurement Guidelines.  Radiated Method Only  - 1. Check the calibration of the measuring instrument using either an internal calibrator or a known signal from an external generator.  - 2. Position the EUT without connection to measurement instrument. Put it on the Rotated table and turn on the EUT and make it operate in transmitting mode. Then set it to Low Channel and High Channel within its operating range, |   |            |

| Test Report | 18070406-FCC-R2 |
|-------------|-----------------|
| Page        | 29 of 54        |

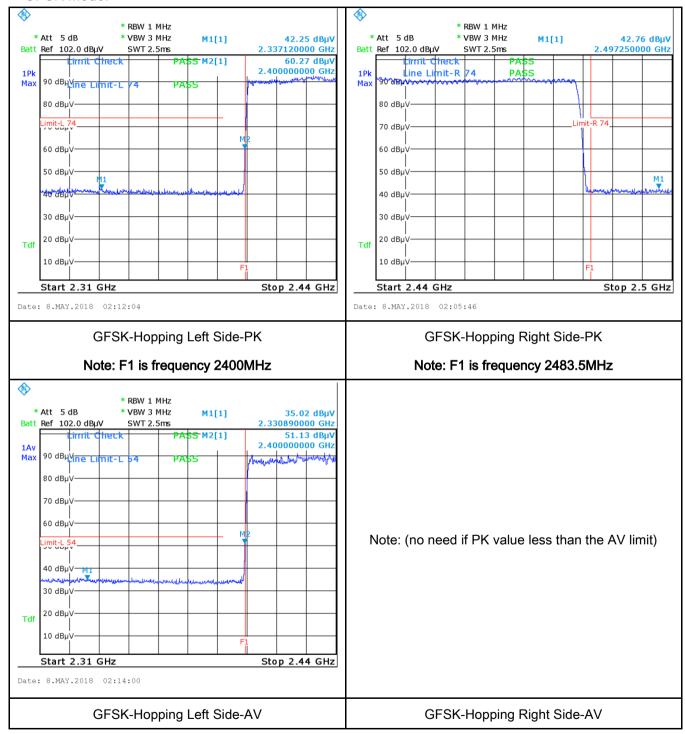

|            | and make sure the instrument is operated in its linear range.                    |
|------------|--|
|            | - 3. First, set both RBW and VBW of spectrum analyzer to 100 kHz with a          |
|            | convenient frequency span including 100kHz bandwidth from band edge, check       |
|            | the emission of EUT, if pass then set Spectrum Analyzer as below:                |
|            | a. The resolution bandwidth and video bandwidth of test receiver/spectrum        |
|            | analyzer is 120 kHz for Quasiy Peak detection at frequency below 1GHz.           |
|            | b. The resolution bandwidth of test receiver/spectrum analyzer is 1MHz and       |
|            | video bandwidth is 3MHz with Peak detection for Peak measurement at              |
|            | frequency above 1GHz.  |
|            | c. The resolution bandwidth of test receiver/spectrum analyzer is 1MHz and the   |
|            | video bandwidth is 10Hz with Peak detection for Average Measurement as           |
|            | below at frequency above 1GHz.   |
|            | - 4. Measure the highest amplitude appearing on spectral display and set it as a |
|            | reference level. Plot the graph with marking the highest point and edge          |
|            | frequency.   |
|            | - 5. Repeat above procedures until all measured frequencies were complete.       |

## **Test Result:**

Test Mode: Transmitting Mode

Frequency range: 9KHz - 30MHz

| Freq. | Detection | Factor | Reading  | Result   | Limit@3m | Margin |
|-------|-----------|--------|----------|----------|----------|--------|
| (MHz) | value     | (dB/m) | (dBuV/m) | (dBuV/m) | (dBuV/m) | (dB)   |
|       |           |        |          |          |          | >20    |
|       |           |        |          |          |          | >20    |

#### Note:

The amplitude of spurious emissions which are attenuated by more than 20dB below the permissible value has no need to be reported.

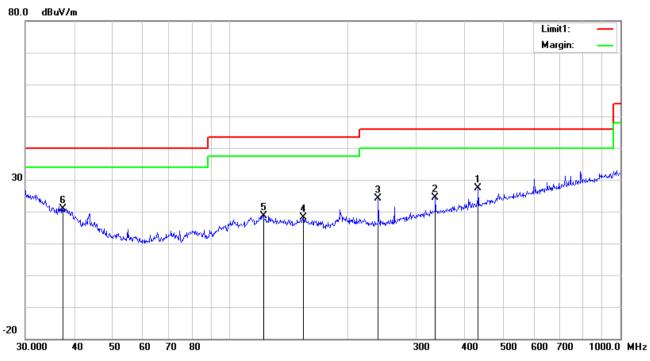

Distance extrapolation factor =40 log (specific distance/test distance)(dB);

Limit line = specific limits(dBuv) + distance extrapolation factor.

#### Note:

- 1, The testing has been conformed to 10\*2480MHz=24,800MHz
- 2, All other emissions more than 30 dB below the limit
- 3, X-Axis, Y-Axis and Z-Axis were investigated. The results above show only the worst case.
- 4, The radiated spurious test above 18GHz is subcontracted to SIEMIC (Nanjing-China) Laboratories. and found 30dB below the limit at least.

# Annex C. il. SUPPORTING EQUIPMENT DESCRIPTION

The following is a description of supporting equipment and details of cables used with the EUT.

## Supporting Equipment:

| Manufacturer | Equipment<br>Description               | Model            | Serial No |
|--------------|--|------------------|-----------|
| SWAGTEK      | Adapter 1                              | A31A-050055U-US1 | N/A       |
| SWAGTEK      | Earphone                               | LOGIC X4G        | N/A       |
| Agilent      | Agilent Wireless Connectivity Test Set |                  | N/A       |
| OEM          | omnidirectional antenna                | AntSuck          | N/A       |

## Supporting Cable:

| Cable type | Shield Type  | Ferrite<br>Core | Length | Serial No |
|------------|--------------|-----------------|--------|-----------|
| USB Cable  | Un-shielding | No              | 0.8m   | N/A       |
