User Manual
Profile
Brand name：iSWAG
FCC ID:O55PROFILE

Please read the following guidelines before using your new iSWAG Profile phone. Utmost compliance with the following is highly recommended for your safety. Non-compliance may pose danger to you and your mobile phone, and may be illegal.

The iSWAG Profile is packed with features to satisfy your needs such as Phonebook, Music Player, Video Player, Digital Camera, among others. It is Wi-Fi and Bluetooth capable and also meets the GSM/GPRS technical criteria. It is certified by both local and international authorities.

iSWAG reserves the right to modify technical specifications without prior notice. Some content in this manual, i.e. software, images, accessories and more, may vary from that in the actual device. Please refer to your unit for accuracy.

This guide aims to help you get started on your new iSWAG phone. Aside from the last two parts of this guide i.e. Section 6 - Important Safety Precautions and Section 7 - Troubleshooting, you will find the following icons periodically present to help you make better use of your device.

→   - indicates sequence of processes

- presents additional notes on a topic or alternative options for a feature

- shows further cautionary measures to prevent damage to your mobile phone

1. Getting Started

Switch your Mobile Phone ON / OFF

To switch your mobile phone ON, press and hold the Power Key until an animation appears on the screen. Make sure the battery is charged inserted properly.

To switch OFF, press and hold the Power Key until a window pops up.

Tap **Power Off** → **OK** and the phone will shut down.
Install / Remove the SIM Card and Battery

Make sure to switch off the device and disconnect from charger before installing and removing the SIM card and battery. To install / remove the SIM card and battery, perform the following:

1. Snap open the phone's back cover and pull out the battery.
2. Carefully insert the SIM card into the SIM card slot, making sure that the card's gold plate is facing down and in proper alignment with the phone's metal contacts.
3. Carefully return the battery into its slot and put the cover back on.
4. To remove, carefully slide the card out of the slot.

: If the screen displays that the SIM card is locked **permanently**, please consult your network operator.

Install / Remove the Memory Card

The Memory Card is a handy mobile storage device that expands the mobile phone's storage capacity. To install / remove the memory card, perform the following:

1. Tap and hold the Power Key to shut off the mobile phone.
2. Snap open the phone's back cover.
3. Remove battery.
4. Carefully insert the Memory Card into its slot, make sure that the card's gold plate is facing down and in proper alignment with the phone's metal contacts.

5.   Return battery.
6.   To remove, carefully slide the card out of the slot.

: It is vital that you restart your phone for it to identify with the newly inserted memory card.

Charge the Battery
1.   Plug the charger into the electrical outlet.
2.   Connect the small end of the charger connector into the mobile phone's charging slot.
The battery indicator icon will flash until charging is finished. When charging is complete, i.e. the battery charging icon stops flashing, disconnect the phone from the charger.

: Do not forget to unplug the charger from the electrical outlet after charging.

: Only use iSWAG approved charger and other accessories.

: You can use the phone while charging, but charging time may increase. When charging the handset in its Power Off state, a charging indicator will appear on the screen.

Switch to Sleep Mode / Wake Up
The Sleep Mode suspends your device to a low power consumption state in order to prolong battery life. Your device also goes into Sleep Mode by itself when the display automatically turns off after a certain period of time, depending on display settings.
Lightly press Power Key to switch to Sleep Mode.
Press the Power Key to Wake Up / activate your screen display.
To configure sleep settings, go to **Settings → Display → Sleep → choose time**

: Switching the Phone to Sleep Mode is a way to lock your phone.

4

Screen Lock

You can lock your screen for additional security. After you set a lock, the screen is locked after the display goes to sleep.

1.   Go to **Settings →Security → Screen lock.**
2.   Touch the type of lock you want and follow the onscreen instructions.

You can choose among these lock options:

Slideprovides no protection, but lets you get to the Home screen quickly.

Face Unlocklets you unlock your tablet by looking at it. This is the least secure lock option.

Pattern lets you draw a simple pattern with your finger to unlock the tablet. This is slightly more secure than Face Unlock.

PIN requires four or more numbers. Longer PINs tend to be more secure.

Password requires four or more letters or numbers. This is the most secure option, as long as you create a strong password.

: A strong password is usually eight or more characters long, and is composed of alphabumeric characters and symbols.

Unlock Your Phone

Drag the icon to the right, depending on your screen lock pattern.

: To set Screen Lock pattern, go to **Menu → Settings → Security → Screen Lock → choose from options.**

<u>Security Codes</u>

The mobile phone and the SIM card support several passwords in order to prevent misuse. When prompted to enter any of the codes mentioned below, type in the correct code and then confirm by tapping the OK key. To access the phone's settings for these codes, go to **Menu [** **] → Settings [** **]→ Security → Set up SIM card lock →Choose which card to lock →Lock SIM Card→ enter SIM PIN → OK**

Personal Identification Number (PIN)

Local network service providers furnish each SIM card with a unique set of codes including the PIN, PIN2 and PUK. If the PIN is incorrectly entered for three successive times, the SIM card will be locked.

To unlock the SIM card, you need to enter the PUK or the Personal Unlocking Key.

For further information regarding PIN, PUK and SIM Lock, contact your network service provider.

Basic Troubleshooting for locked SIM card:

-Enter the correct PUK. You will then be prompted to enter a new PIN.

-Type in the new PIN → OK.

-Re-type the new PIN → OK.

PUK

The PUK (Personal Unlocking Key) code is required in order to modify a blocked PIN. This code usually comes with the SIM card upon purchase. Otherwise, contact your local service provider.

⚠: If you enter the wrong PUK code for 10 consecutive times, the SIM card will become invalid.

Functions of Capacitive Keys

▬Menu Key – opens a folder, app or feature; displays further options for a running or ongoing application. Tap and hold the Home Key to view recently browsed/accessed/used applications

⌂Home Key – returns to the main screen in one touch

⟲Back Key – makes the screen go back one level

Up/Down Keys – turns the volume up or down

Power/Lock Key – switches the phone on or off; locks/unlocks or sleeps/wakes your phone

Touch Control

Your phone is receptive to the following finger gestures:

TAP – selects or launches an item or an app i.e. selecting from the menu, entering characters or text in a field.

TAP & HOLD - activates widgets and offers further options to an application. tap& hold an item on the screen by touching it and not lifting your finger until an action occurs.

DRAG - tap & hold an item and then, without lifting your finger, move your finger on the screen to reposition it on the screen.

SWIPE OR SLIDE - lets you scroll the screen up, down, left or right. It is also used when unlocking the screen. Lightly and quickly touch and slide your finger across the screen without pausing to avoid dragging an item instead.

DOUBLE-TAP - lets you zoom in or out a screen Tap quickly twice on a webpage, map, or other screen to zoom.

PINCH - lets you zoom in or out a screen by placing two fingers on the screen at once and pinching them together (to zoom out) or spreading them apart (to zoom in).
The Home Screen

To move between Home screens, swipe left or right.

Change the Wallpaper:

Tap and hold any clear part of the Screen → Choose a wallpaper from Gallery, Live Wallpapers and Wallpapers.

Add Apps and Widgets to Your Home Screen

Tap Home Key →

Tap and hold chosen application/widget to add to the Home Screen.

Drag towards desired position.

Release hold when the Main Screen appears in the background.

Remove Items from Your Home Screen

Tap Home Key to return to the Home Screen.

Tap and hold the item to be removed and drag it towards the [**X Remove**] icon at the top of the screen.

Auto-Rotate Screen

With the Auto-Rotate Screen turned on, you will be able to view items on the screen vertically or horizontally, depending on how you hold your phone. Please note that not all screens are covered by the Auto-Rotate Screen feature.

To turn the Auto-Rotate Screen feature on/off, go to **Menu → Settings → Display → Auto-Rotate Screen → (uncheck)**

You may also drag down the Notifications panel, tap **→Auto-rotation** to activate or deactivate auto-rotate function.

Folders

This allows you to organize your applications in folders on the Home Screen. To make a new folder on your Home screen, tap and hold and drag apps to the Home Screen, and stack them on top of another. They will automatically be grouped into a folder.

To name folder on Home screen
1. Touch the folder icon on Home screen to open
2. Touch the folder's title bar to show the name field.
3. Edit the folder's name and tap **Done** after renaming.

To remove move applications out of a folder back to the Home Screen
Touch and hold the item in a folder, and then drag it out of the folder.
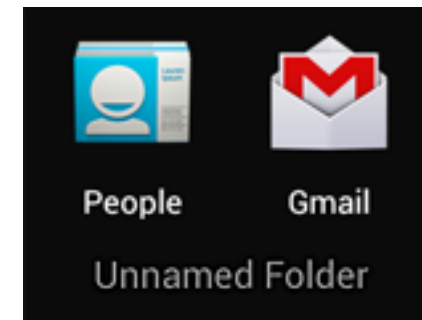

Using the Home Screen even when locked

While the screen is locked, you may assign several quick access items on the Home Screen by swiping the screen down.
Swipe left/right to gain quick access. To add items, tap **+** and choose from list.

Voice Search

Your phone operates via voice command. Search items in your phone or on the Internet simply by speaking. Tap on any screen that it is visible and follow prompt before speaking.For texting/typing using speech, go to Messaging on page 15.
You may also go to → to access voice search.

Status and Notification Icons
To view your phone's notifications, simply swipe the notifications bar downwards. Below are the possible status icons you will encounter and their meanings:

	USB connected		Missed call		Meeting mode		Earphone insert
	Airplane mode		Signal strength		Alarm set		Signal searching
	Battery charge		New message		Silent mode		USB debugging connected
	Bluetooth icon		Wi-Fi network		Data Conn. off		New Wi-Fi network detected

Notifications
The Notifications panel letsyouview notices, warnings and any new updates in your phone.

To open the Notifications panel
Found on the top part of the screen, swipe the notifications panel (alsoknown as the status bar) downwards.

Swipe upwards to close.

*To open a running application from the Notifications panel*

From the Notifications panel, touch the icon for the running application to open it.

To dismiss notifications, tap

Toolkits

ToolKits quickly start applications such as Bluetooth, WLAN and so on.

- Using two fingers, swipe the Notifications panel downwards.
- Tap a ToolKit to enable or disable.

3. Basic Functions
Make and Answer Calls

Make a Call

Option 1: On the Home Screen tap ![phone icon] → choose the Phone tab → enter phone number →tap ![call icon] .

Option 2: Tap ![keypad icon] → ![phone icon] → enter phone number →tap ![green call icon] .

Option 3: Tap ![keypad icon] →Contacts→ tap name of selected contact

![pencil icon]: Tap ![backspace icon] to erase incorrect digits.

Dial an International Call

For international calls, type (+) followed by the country code and then the complete number.

(+) (Country Code) (complete phone number) then tap ![call icon]

![pencil icon]: Tap and hold ![0+ key] to type "+" and then type the country code, the area code and the telephone number. Then tap the telephone icon to connect.

Dial an Emergency Call

This phone operates using radio signals, wireless and landline networks, but cannot guarantee connection in all locations at all conditions. It is not advisable to rely **solely** on wireless phones to make emergency calls. To make an emergency call:

1.   Switch your phone on.
2.   Dial emergency number and tap Call.

![pencil icon]: Some networks may require that a valid SIM card is properly inserted in the phone before making an emergency call. Emergency numbers vary in every country. Emergency calls may not work in all locations due to network and interference issues.

Answer / Reject an Incoming Call
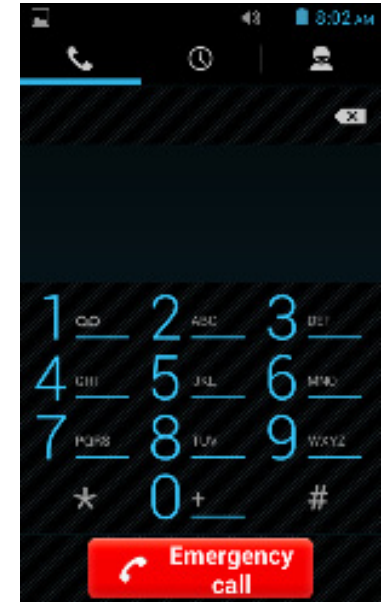

When you receive an incoming call, a notification message appears on the screen.

To accept call, drag ![icon] towards ![icon]

To reject, drag ![icon] towards ![icon]

Drag ![icon] towards ![icon] to send a message instead.

Adjust the Volume
During a call, press the Side Keys to adjust the volume.

Options During a Call

![icon] - Launch/Hide Dial Pad

![icon] - Turn speakerphone on/off

![icon] - Mute

![icon] - Put a call on hold

![icon] - add current call's details to contacts.

Manage Contacts
You can add contacts on your phone and synchronize them with the contacts in your Google account or other accounts that support contact syncing. To manage your contacts, go to ![icon] →Contacts [![icon]].

![icon] - Create contact. Choose storage → fill out fields → tap Done.

![icon] - Search. Type name or number of contact you wish to find →Next.

![icon] - Groups. To add a group, tap ![icon] → type group name → insert group members →Done.

![icon] - Favorites. To add contacts to Favorites, tap contact → ![icon] (on the upper right corner of the screen.)
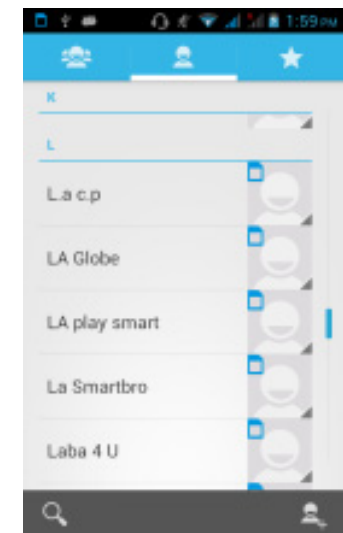

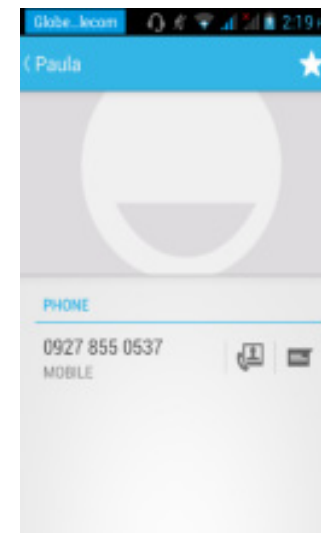

![icon] - Send message

Messaging

To access this, go to ⊞→ ⊞→ **Language and Input.** It also lets you activate/deactivate the spell checker, Android keyboard and Google voice typing. It also lets you manage settings for the voice search, text-to-speech output and the pointer speed.

Backup & Reset
If activated, this sub-menu allows you to back-up your data, WLAN passwords and other settings to Google servers.
The Factory Data Reset erases all data in your phone's internal storage including your accounts, system and app data, downloaded apps.
To access this, go to ⊞→ ⊞→ **Backup & Reset → Factory Data Reset →Reset Phone → Erase Everything**
Accounts
The Accounts sub-menu allows you to add corporate, e-mail, Facebook, Twitter and Google accounts,synchronize

them with your phone, send and receive data anytime, either automatically or manually.To access this, go to → → **Accounts.**

Under the **System** Category:

Date & Time

This lets you choose whether to automatically update your phone's date and time or otherwise.You may also automatically synchronize your phone's date and time according to your time zone.

In this sub-menu, you may also set the date, time, time zone, time and format. To access this go to → → **Date & Time.**

Accessibility

You can use the Accessibility settings to configure any plug-ins you have installed on your device. To access this, go to → → **Accessibility.** You may enable or disable the following services on your phone by marking/unmarking the following options' checkbox:

- Auto Reboot
- Large Text
- Power button ends call – end a call by pressing the Power Key once.
- Auto-rotate screen
- Text to Speech output
- Touch and hold delay
- Enhance web accessibility

Developer Options

This lets you view your Development Device ID and enable or disable the debug mode when USB is connected. Other options include:

USB Debugging – proceeds to debug mode when USB is connected

Stay awake – the screen will not be put to sleep mode while charging

Allowmocklocations – lets you use a different location regardless of your actual whereabouts.

About Phone

This allows you to view system information including system & software updates, status, legal information, model number, Android version, baseband version, kernel version, build number and custom build version. Tap → → **About Phone.**

6. Important Safety Precautions

This mobile phone meets quality standards set by national authorities and complies with safety requirements on harmless human exposure to radio waves.
Kindly read the following guidelines before using your wireless phone. Utmost compliance with these precautions is highly recommended for your safety.
Non-compliance may pose danger to you and your mobile phone, and may be illegal.

General Precautions
- Use only authorized accessories and batteries by the manufacturer. The use of incompatible batteries and accessories may cause battery leaks, overheating, rupture or fire. This may also nullify your warranty.
- Do not put the battery, phone and charger in a high-pressure container or microwave, as this may result in circuit damage or fire.
- Do not use the mobile phone near flammable and explosive materials. Doing such may cause explosion or fire.
- Do not store the phone in areas with high temperature as this can cause extensive damage to the handset.
- Keep the phone out of children's reach.

 Do not use your phone while driving. Keep your hands free when operating a moving a vehicle and observe road safety rules and traffic regulations to avoid unfortunate incidents.
 If you are with a pacemaker, make sure to use your phone at least 20 centimeters away from the medical device as it may interfere with its function. Consult your physician for more information.

Phone
- DO turn off your mobile phone inside aircrafts, hospitals and other locations where its use is restricted. Use of handsets in prohibited areas is dangerous as it may cause interference in the operation of electrical and medical equipment.

- DO keep your mobile phone away from moisture. Contact with water or any liquid may cause the phone to malfunction and overheat.
- DON'T disassemble or remodel your phone as this may cause permanent and irreparable damage. This may also void your mobile phone's warranty.
- DON'T use sharp or pointed objects in pressing you phone's keys as this can cause damage.
- DON'T use your handset if you notice any damage (e.g. broken antenna) as this may cause injury to the user.

Battery
- Each iSWAG handset is equipped with a rechargeable battery. Use only authorized iSWAG batteries and accessories.
- For better performance and longer battery life, initial charging of at least four (4) hours is recommended when using the mobile phone for the first time.
- The optimum performance of a new battery is achieved only after two or three complete charge and discharge cycles. Overcharging, however, may affect battery life.
- Do not use a damaged battery or charger. If battery life becomes noticeably shorter than usual, it is recommended to replace it with a new one.
- While charging, keep the mobile phone out of children's reach.
- Store the battery in a cool and dry place away from direct sunlight, dust and water.
- Avoid exposing batteries to extreme temperature (below -10°C or above 50°C).
- Unplug the charger from the electrical outlet when not in use.
- Avoid using the charger in a wet environment. If the charger comes in contact with water or any form of liquid, immediately unplug it from the outlet to reduce the risk of overheating, charger malfunction, electric shock or fire.
- Be careful with the disposal of spent batteries. Avoid throwing them in a fire, as this may cause explosion. It is recommended to abide by local environmental laws and guidelines on proper waste disposal.

- Do not short-circuit the batteries (i.e. when metal objects such as coins, are directly connected to the metal side of the battery) as this will damage your phone. It is advisable to handle spare batteries with extra care.

Cleaning and Maintenance
- The handset, battery and charger are not water-resistant and should always be kept dry. Avoid using them in excessively moist areas.
- Use a soft, dry cloth to clean the handset, battery and charger.
- Do not use alcohol, thinner, benzene or other solvents to clean the handset.
- Avoid charging the mobile phone through a dirty outlet as this causes poor electrical contact and results in power lost and charging failure.

7. Troubleshooting

Below is a list of common problems that may occur when using your mobile phone. Before running to a Cherry Service Center, you may want to troubleshoot the issues first in order to save time and energy.
For better performance, it is recommended to always fully charge your battery.
Avoid storing too much data in the phone as this may affect its performance.

1. <u>Phone does not switch on</u>
   - Press and hold the end key until image appears on the display.
   - Check the battery charge level.
   - Remove and insert the battery, and switch your phone on again.
2. <u>Phone does not respond for several minutes</u>
   - Press and hold the end key.
   - Remove and insert the battery, and switch your phone on again.
3. <u>The phone switches off by itself</u>

- Check if the keypad is locked when left unused.
- Check the battery charge level.

4. The battery won't charge
- Make sure the battery is not fully drained.
- Make sure that the battery is inserted correctly.
- Use only ISWAG approved batteries and chargers.
- Double check if the charger connector is properly connected to the mobile phone or not.

: The charger can be connected only after the battery is inserted.

5. Standby time is too short
- Standby time has something to do with the system settings of your local network service provider. Switch your phone off in a weak signal area.
- In some cases, you might need to replace the battery.

6. Cannot connect to a network
- Move to an area with better coverage.
- Contact your local network service provider.
- Try to manually select a network.

7. SIM Error
- Make sure that SIM card is properly inserted in its intended spot.
- Make sure that the chip in the SIM card is not damaged or the SIM card is not scratched.
- Check the coverage of your local network service provider if you appear to be out of coverage or have weak signal. You may opt to move near a window.

8. Cannot make calls
- Make sure that the number you dialed is correct and the dial key has been pressed.
- Use the full national area code.
- When abroad, use country-specific international access codes

9. <u>Cannot receive calls</u>
- Make sure that your phone is connected to a network (Check if the network is busy or invalid).
- Check the Call Diverts settings.
- Check the Incoming Call Barring settings.

10. <u>The caller's number is not displayed</u>
- Contact your local network service provider as the caller might have withheld his or her number.

11. <u>Entries cannot be made in Phonebook.</u>
- Check if the Phonebook is full. If so, you may have to delete some records in order to accommodate new ones.

12. <u>The caller cannot leave a voicemail message</u>
- Contact your local network service provider
- Make sure that the voice mail number you have saved is correct.
- If the network is busy, try again after a few minutes.

13. <u>Messages cannot be sent/received</u>
- You may have to delete some old or saved messages, as the message capacity of the phone is limited.
- Contact your local network service provider and verify your service center number.

14. <u>PIN is entered incorrectly three times</u>
- Enter the PUK code (PIN Unlock Code). This code usually comes with the SIM card upon purchase. Otherwise, contact your local service provider.

Thank you for using iSWAG Profile. For further questions and concerns, please do not hesitate to contact us or your local iSWAG Service Center. For information about our iSWAG Service Center contact details, please visit our website at http://swagtek.com/

The iSWAG eWarranty is an innovative service that replaces the traditional warranty card.

All iSWAG phone owners are entitled to the iSWAG eWarranty. One simply has to register as soon as he or she gets hold of the phone. The five easy steps are illustrated in the following pages.

(Please make sure the phone has a valid SIM card with at least P5.00 credits to activate the service.)
STEP 1
Read the message carefully. Choose **NEXT** to proceed, or **CANCEL** to defer.
Note: If left deferred for over three (3) days, the user will have to activate the eWarranty manually.
STEP 2
Leave the Frontliner Code field blank, unless a code is provided by a iSWAG authorized distributor.
The Phone Model is automatically indicated in the field
Select **Options → Save.**
Note: The user may also opt to have the iSWAG eWarranty activated upon purchase for more convenience.
STEP 3
A Cherry Zone welcome message will appear upon successful registration. Select **NEXT** to proceed.
STEP 4
Carefully read the terms and conditions of the iSWAG eWarranty.
Select **AGREE** to proceed to the next step.
Note: If user opts to reject, activation will not proceed, but the iSWAG eWarranty is still available for **manual activation** anytime.
STEP 5
Accomplish the iSWAG eWarranty form.
Select **Options → Save/ Submit**.
The user will receive a confirmation message if the registration is successful.

Note: P2.50 will be deducted from the user's regular balance upon successful registration.

TERMS AND CONDITIONS OF WARRANTY

1. iSWAG provides a one year free warranty of service for phones and tablets, and six months warranty to all accessories (battery, charger, headset) from the date of purchase.

2. The warranty does not cover:

   a) Units with damage caused by mishandling (eg. Broken LCD, Liquid Damage etc), incorrect usage, or from natural disasters.

   b) Unauthorized repair, alteration, and modification of the product, other than authorized iSWAG Service Center Personnel.

The above terms and conditions are for general reference only and are subject to change by iSWAG without prior notice.

FCC RF EXPOSURE INFORMATION:
WARNING!! Read this information before using your phone
In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and Outer FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antennas modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION:
This device was tested for typical body-worn operations with the back of the phone kept 0.5cm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 0.5cm must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories that cannot maintain 0.5cm separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided. For more information about RF exposure, please visit the FCC website at www.fcc.gov

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

<ANSIC95.1> (1992) / <NCRP Report 86> (1986) / <ICIMIRP> (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

NORMAL POSITION:
Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

TIPS ON EFFICIENT OPERATION:
For your phone to operate most efficiently:
• Extend your antenna fully.
• Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

RF Exposure Information:
FCC RF Exposure requirements: The highest SAR value reported under this standard during product certification for use next to the body with the minimum separation distance of 0.5cm is 1.389W/kg; next to the head is 0.573W/kg. This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help

    Do not use the device with the environment which below minimum -10℃ or over maximum 50℃, the device may not work.

    Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
