link from the PDA side.

Install the Keyboard Driver

Connect the Keyboard

Please complete the following steps:

- 1).Check the part “ Before Installation “ first
- 2) Install the driver and then launch the software
- 3) Connect the keyboard to Pocket PC device.

Before Installation

Please disable any other keyboard applications that you have installed on your Pocket PC device to prevent conflicts.

Make sure there is at least 200 Kb of free memory to install the driver. We recommend that you back up all files in your Pocket PC prior to installation.

Step1: Install the Driver

1. Close all active windows on your Pocket PC.
2. Connect your Pocket PC to your desktop computer through the cradle or cable and make sure Microsoft® ActiveSync® is operational.

3. Establish connection between the computer and Pocket PC device by using Microsoft ActiveSync.

4. Insert the CD Disk into the CD-ROM/ Floppy drive.
5. Tap twice on the **My Computer**  icon , and then choose your CD-ROM drive  .
6. Choose the directory which contains the just language version of driver that you want to install.
7. Execute **Setup.exe** inside the directory. Please follow the on-screen procedure step by step.

Step 2: Launch the Software

1. Turn on the Pocket PC.
2. Select **Start > Programs**.

3. Tap the **Foldable Keyboard** icon, and add a check mark in the check box in front of the **Enable Keyboard**.

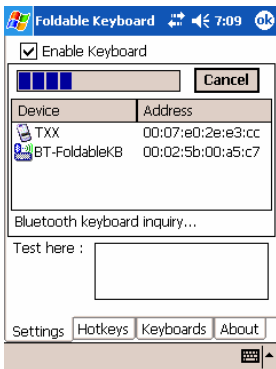

Step 3: Connect Keyboard to Pocket PC

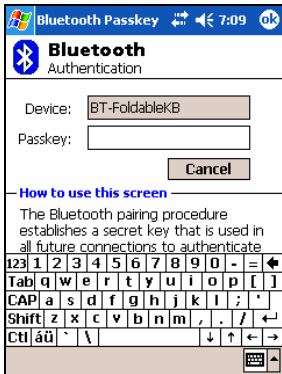

1. Press the connection button to inquiry mode

2. Now PDA will inquiry Bluetooth Keyboard.

2. At first time, you need to key-in Bluetooth Passkey. Passkey is “0000”

3. Put the Pocket PC on the Holder of keyboard.

Disconnect the Keyboard

We recommend you launch the driver program at first. Then, uncheck the box in front of Enable Keyboard. When Keyboard has been disconnected. You will see orange light flash.

Customize Your Keyboard

Configuring the Keyboard

You can have several kinds of typing feeling on your Bluetooth Keyboard by customizing your keyboard:

1. On your Pocket PC, tap the Foldable Keyboard icon and launch it.

2. Select the **Setting** tab.
3. Tap the **Enable Sound** check box to hear a click every time you press a key.

Slide the **Delay until repeat** indicator to lengthen or shorten the time the keyboard waits before repeating a pressed key. The right side of the scale specifies a longer delay time.

Slide the **Key repeat rate** indicator to speed up or slow down the rate at which the keyboard repeatedly displays a pressed key. The right side of the scale specifies a slower repeat rate.

Tap in the **Test here:** field to enter characters from the keyboard.

Frequently Asked Questions

A) How do I uninstall the driver?

Select **Start > Settings > System tab > Remove Programs**.

Select **Foldable Keyboard** from the list of applications. Then press the **Reset** button the Pocket PC for several seconds so your new settings can take effect.

B) I pressed a key on the keyboard, but the letter did not register.

Be sure the keyboard is connected to the Pocket PC via Bluetooth (the connection light will turn off). If the connection is secure, remove the keyboard driver from the Pocket PC, and then reinstall it.

C) How can I make backlight (frontlight) stay on while typing?

Select **Start>Settings>System tab>Backlight(or Frontlight** in some device)

Select **Battery Power** Tab.

Remove a check in the **“Turn off backlight if device is not used for...”** checkbox and then Select **OK**.

D) My Pocket PC will not sync through my serial cradle since installing the Bluetooth Keyboard driver.

It is necessary to disable the Bluetooth Keyboard driver prior to syncing through a serial connection. Please refer to “Launch the Software”, page 7 of this manual. Once you have completed syncing data, you must re-enable the driver to operate the keyboard.

Notices

Federal Communications Commission Statement

This device complies with FCC Rules Part 15. Operation is subject to the following

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the Federal Communications Commission (FCC) rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed

and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION! You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

FCC RF Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment must not be co-located or operating in conjunction with any other antenna or transmitter.
