

Operational Description

This device is a 2.4GHz Digital RF Module. The transmitter of the EUT is powered from DC 9V from host equipment.

The antennas provided to the EUT, please refer to the following table:

Antenna No.	Gain (dBi) Including cable loss	Antenna Type	Connecter Type	Frequency range (MHz to MHz)
1	2	Dipole	NA	2400~2483.5
2	1.2	Dipole	NA	2400~2483.5

From the above antennas, antenna 1 was selected as representative antenna and its data was recorded in this report.

The other instruction, please have a look at the users manual.
