RE: BROMAX COMMUNICATIONS, INC.

FCC ID: O6M-WE302

After a review of the submitted information, I have a few comments on the above referenced Application. Please Note that SAR issued will be issued under a separate letter.

- 1) Please submit a DTS cover letter for this project.
- 2) The elements to each antenna are slightly different. Is the device capable of transmitting out of both antennas, or is one antenna only used for receive only?
- 3) The test report states that the EUT is designed with 2 outer appearances. Please provide specific information as to what these differences are. Are any of the differences changes in the metal, plastic, etc.
- 4) Please updated the EMC test report (page 44) to provide the calculations for the 3.9 GHz bandedge as well.
- 5) Please add the phrase "This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter." to the FCC MPE section (page 2) of the users manual.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
