RE: FCC ID: O6M-WE602B Attention: Ellis Wu I have a few comments on this Application.

- 1. The Manual for the 88mW PCMCIA WLAN does not contain any RF exposure information. Please correct. xxx
- On page 4 you state that the conducted power of the unit is 87.09 mW, yet on page 10 of the report you state that the conducted power of the device is 78.5 mW. Please correct your SAR report to be within the 5% variance allowed between the EMC and SAR report and to be consistent with reported power levels. xxx
