Overview

The model N5 is a low power 2.4 GHz data transceiver, authorized under FCC rule part 15.249. The application is for original single modular approval. Although the device can operate in different modes in the 2.4 GHz band, the output power is the same in all modes. In a KDB inquiry, the FCC confirmed that the device could be authorized under 15.249 for all modes. (See Operational Description 2.pdf.)

Confidentiality requested for allowed files. Request is properly addressed and referenced.

A letter listing the applicable modular requirements was submitted.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
