

American Telecommunications Certification Body Inc.
6731 Whittier Ave, McLean, VA 22101

October 29, 2002

RE: UTStarcom, Inc.

FCC ID: O6YUTS-708J

I have a few comments on this Application.

- 1.) FYI: The original Application shows a SAR report for this device tested with a steady-state carrier and accompanying Crest Factor of 1. This is at odds with the original description of the device as found in the original submission with a Grant Date of April 23, 2001 which shows an on/off duty factor of 1:8, or 12.5%. The MPE evaluation on this current Class II Permissive Change shows a modest increase in power (under 8%) and probably attributable to measurement error. However, since the source based time averaged power is not accounted in the SAR report, no changes significant are deemed necessary and this device is deemed acceptable under 2.1043(b)(2). At the discretion of the Commission, it may be advisable to have additional SAR testing performed, or correct the original SAR findings.
