Dear Helen,

Thank you for your prompt cooperation.

- 1) I just received new schematic diagram from the Humax. The file size is more than 4 MB, so I divided into 2 files. I will send to you in two mails.
- 2) Attached please find a revised test report.

Best Regards,  
Y. G. Gwon

Subject: HUMAX CO., LTD., FCC ID: O6ZSV2, Assessment NO.: AN06T6251, Notice#1

Question #1: Please send a clear version of the schematics.

Question #2: The test report shows the field strength of fundamental emission (Horizontal) is 38.89dBuV/m at 107.9MHz, but the spurious emission (Horizontal) is 39.95dBuV/m at 545.60MHz. Based on FCC 15.215(b), "In no case shall the level of the unwanted emissions from an intentional radiator operating under these additional provisions exceed the field strength of the fundamental emission." Please address this non-compliance issue.

Best Regards,  
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
