Federal Communications Commission

Dear Sir or Madam:

Contained within this document is are pictures of the exterior of the SCU32 transceiver. It is made using the same tooling used for the RELM ARUMPU320B unit. The front panel is shown clear of LOGO's but may have the name of a distributor screened onto it. The FCC label is positioned

The radio is programmed either by cloning from another radio or by a PC. In the case of the PC programming, the application program required to talk to the radio is made available to **only** radio dealers or government agencies.
