

Operational Description

This device is an 802.11g WLAN Mini USB Adapter, which operates in the 2.4GHz frequency spectrum with throughput of up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with CCK technique will be applied.

The transmitter of the EUT is powered by host equipment via a USB interface. The antennas are PIFA and Chip antenna without connector.

The other instruction, please have a look at the users manual.
