RE: Pelican Accessories

FCC ID: O7X-BLDS02

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) The label placement photos on the "receiver/transmitter" may not be correct. The X-Box is essentially a "computer" with specialized accessory ports. This means that in addition to the 15.249 Certification, either Declaration of Conformity or Certification to Part 15B would apply. Please review these requirements and the labeling with your client. If you choose Certification, this will revert to a Composite application with a single FCC ID to cover both Part 15B and 15.249. If DoFC will apply then the FCC logo must appear on this device labeling.
- 2.) The AC conducted Test Setup photos show the "street controller" along with what appears to be an X-Box console and a TV receiver. In addition, the AC conducted photos do not give any indication as to the cabling between the X-Box and its peripherals. Please review and correct as necessary.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
