RE: Palm Inc., Treo 755p (FCC ID: O8F-895) Power Amplifier Module change.

To Whom It May Concern:

The power amplifier modules originally used in the Palm product, Treo 755p (FCC ID: O8F-895), are to be discontinued by the manufacturer Anadigics. The parts being replaced are the Anadigics AWT6137, 800 MHz band power amplifier module and the Anadigics AWT6138, 1900 MHz band power amplifier module.

These two components are being changed to the Triquent TQM713019, 850 MHz band power amplifier module and the Wavics WS1413, 1900 MHz band power amplifier module. These new components are electrically identical and pin for pin identical to the original components.

This Palm model is identical with the originally certified model in both software and hardware designs. The only difference is the PA source.

A handwritten signature in black ink that reads "David Garcia". The signature is fluid and cursive, with "David" on the top line and "Garcia" on the bottom line.

David Garcia
