

Statement

We ,

Name: Hewlett Packard Company
Address: 153 Taylor Street
City: Littleton, MA 01460-1407
Country: United States

Declare that:

The installers must be professionally trained and are qualified to do the installation.

And they must identify the specific expertise as below:

a. Before the installation:

The installers must be trained how to

1. To choose appropriate tools according to the installation environment.
2. Examining the installation site
3. Examining the AP

b. During the installation

The installers must be qualified

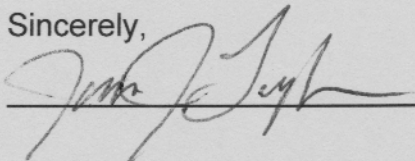

1. Vertically fix the pedestal of the pole to the rooftop or a cement pier on the rooftop with expansion screws.
2. Fix the V-shaped bracket onto the mounting plate with the bolt.
3. Attach another V-shaped bracket to the pole, making sure that the two V-shaped bracket are level. Insert two long bolts through the screw holes on the two brackets and attach the bolts, nuts, and flat and spring washers
4. Fix the AP onto the mounting plate with screws and fasten the screws
5. Installing the outdoor antennas
6. Connecting cables

c. Finished the installation

The installers must be trained how to

1. Verifying the installation
2. Powering on the AP
3. Logging in to the AP

Sincerely,

Jim Taylor / Project Manager
Hewlett Packard Corporation
