Dear Bill,

1. The whole mainboard is under " Limited Modular Approval", not only the circuit card.
2. Uploaded TSup.
3. No, the 2.4GHz 802.11b/g channels, and 5GHz 802.11a channels are not simultaneous transmission.
4. Uploaded.
5. The "Turbo" mode was tested for power and radiated emissions showed test result on report P. 25 and P. 79-83 TestRpt 802.11a

Regards,

Linda
