Re: FCC ID: O9GDVMRMT

To Whom It May Concern:

This will serve as a Change in FCC ID application for above mentioned FCC Identifier.

This device is almost identical to the previously applied for and granted FCC ID: O9G2020RHT. The only differences in the PCB from the originally approved device are very slight differences in LED, button and mounting hole placement. The PCB is slightly longer.

We have performed radiated emissions testing and there is no degradation from the original test data. A Class I Permissive change letter and report was issued to the applicant with the data in the test report showing that it still continues to meet the FCC requirements for this class of equipment.

Should you have any questions or require any further information, please advise.

Regards,

Sharon Hoffman

APPLICANT: TRISQUARE COMMUNICATIONS INC.
FCC ID: O9GDVMRMT
