Columbia, MD 21046

Ref: FCC ID: **O9GTSX300**

Dear Sirs:

TriSquare Communications, Inc. requests acceptance of the labeling proposal described herein for transceivers bearing FCC identifier O9GTSX300. The transceivers are compact handheld models as shown in figure 1, authorized under 47CFR Part 15.247.

Figure 1.

TriSquare Communications

Figure 2

Because the majority of the transceiver housing is composed of display, speaker, operating controls, belt clip, and a removable battery cover, there is extremely limited space available to attach the required label carrying the FCC identifier shown above in figure 2. For this reason, TriSquare Communications proposes placing the label carrying the FCC identifier inside the battery compartment as shown in the first photo in figure 1 above.

The consumer packaging for these models either includes no batteries or includes the battery pack as a separate item, NOT installed in the radio. As such, the FCC identifier will be readily visible to the user during installation of the batteries and whenever the batteries are removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device. The consumer packaging for these models does not allow the rear of transceiver to be seen at time of purchase. In order to meet the requirements of 47CFR Part 2.925 (d), TriSquare Communications will add the FCC identifier "O9GTSX300" to the outside of the consumer packaging.

Sincerely,

Philip A. Staley
