

American Telecommunications Certification Body Inc.
6731 Whittier Ave, McLean, VA 22101

October 16, 2006

RE: PSC Scanning Inc.

FCC ID: O9NPS7K

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Unless I have missed it, I do not find any required compliance information in the Manual. If I have missed it, my apologies. Please help me find the RF safety warnings, the 15.19(a)(3) compliance statement, and the 15.21 'Information to User'.
- 2.) This device appears to have the ability to connect and function with a computer. Will Certification or DoC apply to this device when used as a computer peripheral?
- 3.) Please provide a Label exhibit for this device.
- 4.) Are there any accessories such as belt clips or holsters used with this device? If so, then SAR testing may be required for Canada [threshold = 20mW].
- 5.) FYI: The ATCB website incorrectly showed that this device will be Certified under 15.249. This is obviously incorrect based upon the stated RF power. I have changed the listing to 15.247.
- 6.) Only one page of the ATCB IC Application form has been provided. Please supply a complete Canada application form,
- 7.) Please look at your data table page 30 and compare with the plots on Page 28. I am a bit surprised that there are no radiated emissions on Page 30 that correspond in frequency to the emission on Page 28. Are there any radiated values available for 2481.79, 2483.5, and 2484.4 MHz? I am also a little surprised that for a "narrowband" device with this amount of power there were no emissions to be seen above the second harmonic. Could you kindly re-verify for me please?

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
