To whom it may concern

**INTERMODULATION DECLARATION**

**ELPRO 315-WH Transceiver, FCC ID: O9P-315WH**

On behalf of my client ELPRO Technologies PTY Ltd an assessment of the ELPRO 315-WH Transceiver has been carried out and no inter-modulation products were determined / observed.

This was mainly due to the physical separation between the two transmitting antennas, directional antennas are specified and the significant difference in radiated power between the two systems.

The Wi-Hart system has a maximum radiated output power of 0.2 watts compared to the Wi-Fi system that has a maximum radiated output power of 2.8 watts.

Yours sincerely

A handwritten signature in black ink, appearing to read "Andrew Cutler". The signature is fluid and cursive, written over a light grey rectangular background.
