

DESCRIPTION OF PRODUCT:

The Brivo Access Control System (FCC ID: 09UA206) is a web-based, wireless wide-area network (WWAN) access control solution that offers both local and remote facility access control. The Control Panel (Part # A206-0601) contains the communication device and is installed in fixed mode at the access location. Access/entry authorization information is entered by the end user via a user website and transmitted to the control panel over the Mobitex wireless network, using the RIM 902M modem. The entry authorization information is stored locally in the control panel. Selected activity at the access site (entry of authorized code, multiple invalid code entry, etc.) is transmitted to the end user's website via the same modem.

Part Number:

Transformer and Cable	-	A201-0601
Antenna Kit	-	A202-0601
Input Device (Keypad)	-	A203-0601
"T" Bezel	-	A204-0601
Round Bezel	-	A205-0601
Control Panel	-	A206-0601

(The numbering system will use the same prefix (i.e. A206 for control panel) with the suffix changing for different models/versions, as appropriate (i.e. -060X).

FCC Label:

The FCC label will be placed conspicuously on the outside top of the Control Panel. The label is shown below (actual size):

FCC ID: 09UA206 CANADA: XXXXXX
