

Compliance with FCC Guidelines For Human Exposure to Radio Frequency Electromagnetic Fields

This equipment integrates the RIM 902M OEM Radio Modem (FCC ID: L6AR902M-2-O).

In accordance with the integrators guide, Brivo will be supplying the Austin 200160 500C with 0dBd gain antenna.

RIM 902M OEM Radio Modem integrators using the listed antennas in mobile configurations would not require separate FCC approval for RF exposure compliance with respect to MPE limits.

The user's manual includes the following instructions for mounting the antenna to satisfy RF exposure concerns.

FCC RF Exposure Notice: To meet the FCC RF exposure requirement for mobile transmitter end products using the Austin 200160 500C, 0 dBd antenna, ensure that the antenna is at least 20cm (8") away from the user or nearby persons when transmitting.
