

1. Product Introduction

The visual communication that you dreamed on has come true.

Thank you very much for your purchase of our videophone. GVP is a standalone type videophone for your home or office use. It supports H.324 standard to make videophone connection via normal analog phone line. Build-in CCD camera can catch a realistic image and send to the remote side. You can view the remote side on the 4 inches TFT LCD.

With our GVP, now you can, not only talk, but also see everyone eye to eye in any location worldwide. This video and audio communications with other people bring you much closer to your family and your friends.

The installation and using of this product is very easy and simple. Just plug in the telephone line and the power line into this system. You can then enjoy all the features offered by GVP. To enjoy with GVP, just follow up the GUI and feel free about the call charge. It adapts normal phone call rate.

Please read this user's manual to help you understand how to use the GVP and enjoy with various additional functions. It has detailed instructions on how to connect and operate this product. Keep this for future reference.

If you have any question and need technical support of this product, please contact your local agency for possible assistance. We guarantee all the after sales service and appreciate your choice.
