

EMC TEST REPORT

Report No.: 16020930-FCC-E

Supersede Report No.: N/A

Applicant	Ringway Tech(Jiangsu) Co.,Ltd.	
Product Name	DIGITAL PIANO	
Main Model No.	AG-50	
Serial Model	AG-30	
Test Standard	FCC Part 15 Subpart B Class B:2014, ANSI C63.4: 2014	
Test Date	July 22 to July 25, 2016	
Issue Date	July 29 , 2016	
Test Result	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail	
Equipment complied with the specification	<input checked="" type="checkbox"/>	
Equipment did not comply with the specification	<input type="checkbox"/>

Laboratories Introduction

SIEMIC, headquartered in the heart of Silicon Valley, with superior facilities in US and Asia, is one of the leading independent testing and certification facilities providing customers with one-stop shop services for Compliance Testing and Global Certifications.

In addition to testing and certification, SIEMIC provides initial design reviews and compliance management throughout a project. Our extensive experience with China, Asia Pacific, North America, European, and International compliance requirements, assures the fastest, most cost effective way to attain regulatory compliance for the global markets.

Accreditations for Conformity Assessment

Country/Region	Scope
USA	EMC, RF/Wireless, SAR, Telecom
Canada	EMC, RF/Wireless, SAR, Telecom

1. Report Revision History

Report No.	Report Version	Description	Issue Date
16020930-FCC-E	NONE	Original	July 29 , 2016

2. Customer information

Applicant Name	Ringway Tech(Jiangsu) Co.,Ltd.
Applicant Add	No. 101 West Hanjiang Road, Changzhou,Jiangsu, China
Manufacturer	Ringway Tech(Jiangsu) Co.,Ltd.
Manufacturer Add	No. 101 West Hanjiang Road, Changzhou,Jiangsu, China

3. Test site information

Lab performing tests	SIEMIC (Nanjing-China) Laboratories
Lab Add	2-1 Longcang Avenue Yuhua Economic and Technology Development Park, Nanjing, China
FCC Test Site No.	986914
IC Test Site No.	4842B-1
Test Software	Labview of SIEMIC version 1.0

4. Equipment under Test (EUT) Information

Description of EUT: DIGITAL PIANO

Main Model: AG-50

Serial Model: AG-30

Date EUT received: July 18, 2016

Test Date(s): July 22 to July 25, 2016

Port: USB to Host Port, Headphones 1/2 Port, Bluetooth Port, Aux in Port, Line out Port, PEDAL Port, Power Port, MIDI Out Port

Power: AC 110/220V ~50/60Hz

Trade Name : Artesia

FCC ID: OCDAG-50

Note: the difference between the two models please refer to **Annex E. DECLARATION OF SIMILARITY** in this report.

Test Report No.	16020930-FCC-E
Page	7 of 38

5. Test Summary

The product was tested in accordance with the following specifications.
All testing has been performed according to below product classification:

FCC Rules	Description of Test	Result
§15.107; ANSI C63.4: 2014	AC Power Line Conducted Emissions	Compliance
§15.109; ANSI C63.4: 2014	Radiated Emissions	Compliance

Measurement Uncertainty

Emissions		
Test Item	Description	Uncertainty
Radiated Emissions	Confidence level of approximately 95% (in the case where distributions are normal), with a coverage factor of 2 (for EUTs < 0.5m X 0.5m X 0.5m)	3.952dB

6. Measurements, Examination And Derived Results

6.1 AC Power Line Conducted Emissions

Temperature	24°C
Relative Humidity	50%
Atmospheric Pressure	1013mbar
Test date :	July 25, 2016
Tested By :	Amos Xia

Requirement(s):

Spec	Requirement	Applicable																									
47CFR §15.107	<p>For Low-power radio-frequency devices that is designed to be connected to the public utility (AC) power line, the radio frequency voltage that is conducted back onto the AC power line on any frequency or frequencies, within the band 150 kHz to 30 MHz, shall not exceed the limits in the following table, as measured using a 50 [mu]H/50 ohms line impedance stabilization network (LISN). The lower limit applies at the boundary between the frequencies ranges.</p> <p style="text-align: center;">Class B digital devices</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th rowspan="2">Frequency ranges (MHz)</th> <th colspan="2">Limit (dBµV)</th> </tr> <tr> <th>QP</th> <th>Average</th> </tr> </thead> <tbody> <tr> <td>0.15 ~ 0.5</td> <td>66 to 56</td> <td>56 to 46</td> </tr> <tr> <td>0.5 ~ 5</td> <td>56</td> <td>46</td> </tr> <tr> <td>5 ~ 30</td> <td>60</td> <td>50</td> </tr> </tbody> </table> <p style="text-align: center;">Class A digital devices</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th rowspan="2">Frequency ranges (MHz)</th> <th colspan="2">Limit (dBµV)</th> </tr> <tr> <th>QP</th> <th>Average</th> </tr> </thead> <tbody> <tr> <td>0.15 ~ 0.5</td> <td>79</td> <td>66</td> </tr> <tr> <td>0.5 ~ 30</td> <td>73</td> <td>60</td> </tr> </tbody> </table>	Frequency ranges (MHz)	Limit (dBµV)		QP	Average	0.15 ~ 0.5	66 to 56	56 to 46	0.5 ~ 5	56	46	5 ~ 30	60	50	Frequency ranges (MHz)	Limit (dBµV)		QP	Average	0.15 ~ 0.5	79	66	0.5 ~ 30	73	60	<input checked="" type="checkbox"/>
Frequency ranges (MHz)	Limit (dBµV)																										
	QP	Average																									
0.15 ~ 0.5	66 to 56	56 to 46																									
0.5 ~ 5	56	46																									
5 ~ 30	60	50																									
Frequency ranges (MHz)	Limit (dBµV)																										
	QP	Average																									
0.15 ~ 0.5	79	66																									
0.5 ~ 30	73	60																									
Test Setup	<p style="text-align: center;">Note: 1.Support units were connected to second LISN. 2.Both of LISNs (AMN) are 80cm from EUT and at least 80cm from other units and other metal planes support units.</p>																										
Procedure	<ol style="list-style-type: none"> 1. The EUT and supporting equipment were set up in accordance with the requirements of the standard on top of a 1.5m x 1m x 0.1m high, non-metallic table. 2. The power supply for the EUT was fed through a 50W/50mH EUT LISN, connected to filtered mains. 3. The RF OUT of the EUT LISN was connected to the EMI test receiver via a low-loss coaxial cable. 4. All other supporting equipment were powered separately from another main supply. 5. The EUT was switched on and allowed to warm up to its normal operating condition. 6. A scan was made on the NEUTRAL line (for AC mains) or Earth line (for DC power) over the required frequency range using an EMI test receiver. 7. High peaks, relative to the limit line, were then selected, The EMI test receiver was then tuned to the selected frequencies and the necessary measurements made with a receiver bandwidth setting of 10kHz. 8. Steps 6-7 were repeated for the LIVE line (for AC mains) or DC line (for DC power).

30 – 88	90																					
88 – 216	150																					
216 – 960	210																					
Above 960	300																					

Procedure	Requirement
1.	The EUT was switched on and allowed to warm up to its normal operating condition.
2.	The test was carried out at the selected frequency points obtained from the EUT characterisation. Maximization of the emissions, was carried out by rotating the EUT, changing the antenna polarization, and adjusting the antenna height in the following manner: <ul style="list-style-type: none"> a. Vertical or horizontal polarisation (whichever gave the higher emission level over a full rotation of the EUT) was chosen. b. The EUT was then rotated to the direction that gave the maximum emission. c. Finally, the antenna height was adjusted to the height that gave the maximum emission.
3.	For emission frequencies measured below and above 1GHz, set the spectrum analyzer on a 100kHz and 1MHz resolution bandwidth respectively for each frequency measured.
4.	Steps 2 and 3 were repeated for the next frequency point, until all selected frequency points were measured.

Annex E. DECLARATION OF SIMILARITY

Ringway Tech(Jiangsu) Co.,Ltd.

To: SIEMIC(Nanjing-China) Laboratories

Declaration Letter

Dear Sir,

For our business issue and marketing requirement, we would like to list different models numbers on the FCC certificates and reports, as following:

Model No.: AG-50, AG-30
FCC ID:OCDAG-50

The difference between the two models AG-50 and AG-30 are as follows:

1. The shape of the wooden parts is different.
2. There are 8 speakers in AG-50; there are 6 speakers in AG-30.
3. The main control board, power supply board, transformer, amplifier board and other boards are same.
4. Because quantity of speaker is not same, some values of assembled parts are different between AG-50 and AG-30.

Thank you!
