4.

TURNING PAGER ON

OFF 06:00A

< Power off mode >

01-01 06:00A

< Stand by screen >

Press and hold the Read button for 2seconds while pager is in the Off mode.

Time and date will appear on the bottom center of the screen.

Upon inserting a battery, pager will vibrate and beep briefly as it enters the normal reception mode.

If unread new messages are, new icon and the number of unread messages are displayed on the screen. And if all messages are read, the number of messages in memory is displayed.

5. TURNING PAGER OFF

Press the Function button to enter the Function mode. Press the Function button repeatedly until "**POWER OFF?**" is displayed on the screen.

Press READ button to enter Pager Off mode.

Press the Read Button and Function button simultaneously to move to the main screen (current date and time).

6.

RECEIVING AND READING

MESSAGES

When a message is received, the selected Alert will be activated.

Press the Read button to stop the Alert and to read messages.

The following information will be displayed in the order of the newest to the oldest message:
Message number, time stamp and message.

Reading messages with 13 Characters or more messages with 13 or more characters will display "▶" at the top right corner of the screen.

Press the Read button to read the rest of the message.

When function button is pressed while viewing the Date/Time of a message, the main screen(current date and time) is displayed.

7.

DUPLICATE MESSAGES

Duplicate Message Indicator will be displayed on the screen when the pager receives a message that is identical to a message in memory.

8.

LOW BATTERY INDICATOR

When the battery capacity falls below the operational level, the Low Battery icon will be displayed and the voltage alarm tone will be activated.

A maximum of 14 messages can be locked.
Select a message to be locked and press the Function button.

When "LOCK?" is displayed, press the Read button to lock the message. The Lock icon will be displayed, and the message will be locked.

To unlock messages, select the message to be unlocked and then press the Function button to display "UNLOCK?" on the screen.

Press the Read button.

Locked messages will remain in memory even during low battery power, and while the battery is being changed.

Press the Read Button and Function button simultaneously to move to the main screen (current date and time).

Pager has the memory capacity to store 30 numeric messages, with a maximum of 20 characters per message.

A rectangular box representing a calculator screen with a black background and white text. The text displays the numbers 0 123456 789.A rectangular box representing a calculator screen with a black background and white text. The text displays the word DELETE followed by a question mark.A rectangular box representing a calculator screen with a black background and white text. The text displays the word UNLOCK followed by a question mark. A small lock icon is positioned above the letter 'K'.

DECLARATION OF CONFORMITY

PRODUCT NAME : Numeric Pager

MODEL NUMBER : AN1000F

FCC RULES : TESTED TO COMPLY WITH FCC PART 15, CLASS B

OPERATING ENVIRONMENT: FOR HOME OR OFFICE USE

FCC COMPLIANCE STATEMENT:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

INFORMATION TO USER:

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception (which can be determined by turning the equipment off and on), the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient/Relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from
- that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution : Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate this equipment.
