## Request for Modular/Limited Modular Approval

Date: Jul 11, 2024					
Subject: Manufacturer's Declaration for □ - Lim	lular Approval ited Modular Approval	☐ - Split Modula ☐ - Limited Spli		pproval	
Confidentiality Request for: ( OEJ-NSWRA	DIO)				
8 Basic Require For Items Marked "NO(*)", the Limited Mo	ements – FCC Part 15.212( odule Description Must be		llowing Pages	3	
Modular Approval Re				ment Met	
1. The modular transmitter must have its own RF shielding. This is intended to ensure that the module does not have to rely upon the shielding provided by the device into which it is installed in order for all modular transmitter emissions to comply with FCC limits. It is also intended to prevent coupling between the RF circuitry of the module and any wires or circuits in the device into which the module is installed. Such coupling may result in non-compliant operation. The physical crystal and tuning capacitors may be located external to the shielded radio elements. 15.212(a)(1)(i)		⊠ - YES	□ - NO(*)		
Details:The module has a metal shield. Refer to the ex	Details:The module has a metal shield. Refer to the external photo of EUT.				
2. The modular transmitter must have buffered modulation ensure that the module will comply with FCC requirem over-modulation. 15.212(a)(1)(ii)			🗆 - YES	□ - NO(*)	
Details: Data to the modulation circuit is buffered as described in the schematic provided with the application					
<ol><li>The modular transmitter must have its own power supp ensure that the module will comply with FCC requirem supplying circuitry in the device into which the module</li></ol>	ents regardless of the design	of the power	🖾 - YES	□ - NO(*)	
Details: The module contains its own power supply regulation. Please refer to schematic filed with this application					
4. The modular transmitter must comply with the antenna §§ 15.203, 15.204(b), 15.204(c), 15.212(a), and 2.929(b) attached or employ a "unique" antenna coupler (at all antenna, including the cable). The "professional install to modules but can apply to limited modular approvals	b). The antenna must either be connections between the mo- ation' provision of § 15.203	e permanently dule and the is not applicable	⊠ - YES	□ - NO(*)	
Details: The module uses PCB antenna. The antenna information can be found in antenna spec and operation description provided with the application.					
5. The modular transmitter must be tested in a stand-alone inside another device during testing. This is intended to complying with Part 15 emission limits regardless of th Unless the transmitter module will be battery powered, requirements found in Section 15.207. AC or DC powe the module must not contain ferrites, unless they will be 15.27(a)). The length of these lines shall be length typic least 10 centimeters to insure that there is no coupling be equipment. Any accessories, peripherals, or support equipments and insure that there is no support equipments.	demonstrate that the module e device into which it is even it must comply with the AC r lines and data input/output e marketed with the module cal of actual use or, if that len between the case of the modulipment connected to the mo	e is capable of ntually installed. line conducted lines connected to (see Section ngth is unknown, at alle and supporting dule during testing	⊠ - YES	□ - NO(*)	
Details: The module was tested stand-alone as shown			tion.		

Modular Approval Requirement	Require	Requirement Met		
6. The modular transmitter must be labeled with its own FCC ID number, or use an electron display (see KDB Publication 784748).  If using a permanently affixed label with its own FCC ID number, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.  If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 15.212(a)(1)(vi)	⊠ - YES	□ - NO(*)		
Details: The FCC ID is printed on the label of the module.Refer to the label of EUT.				
7. The modular transmitter must comply with all specific rule or operating requirements applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee. A copy of these instructions must be included in the application for equipment authorization. For example, there are very strict operational and timing requirements that must be met before a transmitter is authorized for operation under Section 15.231. For instance, data transmission is prohibited, except for operation under Section 15.231(e), in which case there are separate field strength level and timing requirements. Compliance with these requirements must be assured. 15.212(a)(1)(vii)	⊠ - YES	□ - NO(*)		
Details: The module complies with FCC Part 15C requirements. Instructions to the OEM installer are provided in the installation manual filed with this application.				
8. The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4). Modular transmitters approved under other Sections of Part 15, when necessary, may also need to address certain RF Exposure concerns, typically by providing specific installation and operating instructions for users, installers and other interested parties to ensure compliance. 15.212(a)(1)(viii)	⊠ - YES	□ - NO(*)		
Details: The module meets RF exposure requirements as shown in the RF exposure information filed with this application.				

## **Limited Module Description – When Applicable**

\* If a module does NOT meet one or more of the above 8 requirements, the applicant may request Limited Modular Approval (LMA). This Limited Modular Approval (LMA) is applied with the understanding that the applicant will demonstrate and will retain control over the final installation of the device, such that compliance of the end product is always assured. The operating condition(s) for the LMA; the module is only approved for use when installed in devices produced by grantee. A description regarding how control of the end product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured should be provided here.
