ZigBee Channel 26 Limitation

June 20, 2012

The Johnson Controls WRZ Radio Module will be set to a power setting of 210 on Channel 26 which corresponds to a maximum output power of 6.72 dBm. The end-user does not have control over the power setting of the product and this power setting will be preset (or Channel 26 disabled) prior to the customer receiving the product. Johnson Controls agrees to never change this setting without performing additional compliance testing and resubmitting the new information to the FCC.

Dated this 20th day of June, 2012.
