To Whom It May Concern,

The chip installed in our product B92 Development Board (model name: TLSR9528ADK88D, FCC ID: OEOTLSR9528ADK88D), which supports Bluetooth 5.3 basic rate (BDR), enhanced data rate (EDR), low energy (LE), ZigBee, 6LoWPAN, 2.4 GHz proprietary and Wi-Fi functions. But for this product, it only activates BDR/EDR($\pi/4$ DQPSK)/BLE(1Mbps and 2Mbps) functions, the other functions are disabled by using the software.

Please contact me if there is need for any additional clarification or information. Best Regards,

Sincerely Yours,

Signature:
