

FCC ID: OF2WCSR30  
731 Confirmation Number: EA99518  
Correspondence Number 17999

- 1) AT&T Wireless Services, Inc. respectfully withdraws its request for confidentiality and understands that no portion of the application will remain confidential.
- 2) You clarified that the average power is 4 watts. However, the requested output power must match the peak measured EIRP since the limit is specified as such. Therefore, clarify the peak EIRP and change the request accordingly so that the grant will reflect the peak EIRP and not the average EIRP

We would prefer the Equipment Authorization Grant to be 36 dBm / 4 Watts Average, however if we need to use Peak values, please use 45 dBm / 32 Watts EIRP Peak per the measurements. Thank you for assistance and please forward any further questions to Keith Peavler, telephone number, 425-702-2914, email [keith.peavler@attws.com](mailto:keith.peavler@attws.com)
