

## FCC ID : OFIOONTZANGLE

### BT (Speaker device)

According to §15.247(e)(i) and §1.1307(b)(1), systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess of the Commission's guidelines.

According to KDB 447498 (2)(a)(i)

| Frequency Range     |                     | Center frequency (MHz) | 60/f SAR Limitation (mw) |
|---------------------|---------------------|------------------------|--------------------------|
| Low Frequency (MHz) | High Frequency(MHz) |                        |                          |
| 2402                | 2480                | 2441                   | 25                       |

Maximum measured transmitter power:

| Conducted Power (dB) | Max Antenna Gain (dBi) | EIRP (mw) |
|----------------------|------------------------|-----------|
| 1.70                 | 2.0                    | 2.34      |

Threshold at which no SAR required is 25 mW.

Maximum Tx power is 2.34mw EIRP

Conclusion: No SAR is required.

Sincerely,

Signature
