Federal Communications Commission

MR Greg Czumak,

This letter is in reply to correspondence #9363
FCC ID OG99520
731 confirmation number EA94389.

By this letter we would like to address the items mentioned in the above correspondence letter.

Item 1:

The set used for SAR testing was the same set used for Connected, and Radiated measurements, without any kind of power level modification. For this reason we are confirming to use 220mW for connected and 414mW for EIRP values, to be put in the Grant.

Item 2:

We already have taken note of the recommendation.

I hope the information we are sending covers the items necessary to comply with the requirements of FCC Part 15 for this product.

Best Regards
Cayetano Chavez.
Compliance Test Team Leader
