

## **Operation Description for R/C Monster Wheels Chubbies**

The R/C Monster Wheels Chubbies is powered by 3 x 1.5V AAA size batteries for Receiver. The radio control channel is 49.860MHz and generated by Q1, L1, C4, R1 super regenerative receiver. When it switched “ON” and received radio control signal, the encoder U1 will decode the signal and control the motor operation through transistor Q2 ~ Q13.
