

Operation Description for R/C Monster Wheels Chubbies

The R/C Monster Wheels Chubbies is powered by 1 x 9V size battery for Transmitter. The radio control channel is 49.860MHz. There are two control sticks in the front of transmitter. When it switched on pressed once, the encoder IC1 will generate a control signal to receiver. The crystal TX1 and transistor Q2 is responsible to generate a radio frequency 49.860MHz and combined with control signal to transistor Q1.
