

Operation Description for R/C Monster Wheels Hi-Rollers

The R/C Monster Wheels Hi Rollers is powered by 2 x 1.5V size batteries for Transmitter. The radio control channel is 27.145MHz. There are two control sticks in the front of transmitter. When it switched on pressed once, the encoder Tx-2 will generate a control signal to receiver. The crystal JT and transistor Q2 is responsible to generate a radio frequency 27.145MHz and combined with control signal to transistor Q1.
