Subject: Applied Wireless Identifications Group Inc., FCC ID: OGSM27CA,
Assessment NO.: AN06T6288, Notice#1

Question #1: The user manual indicates the power level can be adjusted by the OEM integrators. Please clarify whether the power level control can be accessed by the end user.

<answer>it is software protected, appropriate footnotes were also added to the manual.

<Further comment>The footnote said: "It should be noted that 28.0 dBm here represents the upper limit for an end user controlling the power level", which implies the power level control can be accessed by the end user. Please confirm. If necessary, please revise the user manual to clarify this.

<answer> Here is revised manual to address your further question.

Question #2: The user manual lists different operation frequency band in different country domain. Please clarify how the manufacturer prevents the end user from using unauthorized band in US.

<answer>it is software protected, appropriate footnotes were also added to the manual.

Question #3: The user manual does not contain regulatory statement required for OEM installation. Please update the user manual.

<answer>pls see revised manual.

Best Regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the
