Date of Original E-Mail: 04/30/1999

2. Provide a letter which describes what specific exhibits in this application require confidential treatment because they are trade secrets. Remember trade secret information is only information not generally released to the public. Photographs, user's manuals and such are not trade secret information. Schematic diagrams are.

Response:

The exhibit that Versus Technology would like to be confidential is the schematic. The trade secret in concern deals with the way the voltage detection circuit is powered up and read by the processor. This type of configuration allows us to save the badge battery power and gives us a longer duration between battery changes.

Regards,

Robert Wiser
Versus Technology
Manufacturing Manager
