THE FOLLOWING IS THE LABEL MATERIAL FOR THE LABEL:

The label material will be Autotex 2V6. This is a .006 thick polyester
label with a velvet finish. 3M 467 Adhesive with paper backing applied
to
the rear of the label. This is a .002 thick acrylic adhesive.

We do not have actual samples of the Remote Label, although we do have
samples of the label material since we use the same material and
adhesive on
another product.

Please let me know if this information is sufficient.

Thanks
