A photograph of a green printed circuit board (PCB) for a mobile device, likely a mobile phone. The board is populated with various electronic components, including a large black integrated circuit (IC) in the center, several smaller black chips, and numerous surface-mount components. A gold-plated edge is visible on the right side, and a small blue circular component is located near the bottom center. The board is set against a blue textured background.

A black power adapter with a two-prong European plug and a coiled black cable ending in a USB Type-C connector, resting on a blue surface. The adapter has a label with technical specifications and safety warnings. The cable is neatly coiled and secured with a small blue band.
