# Fixed Access Unit (FAU) USER GUIDE

## System Overview

The Globalstar Fixed Access Unit (FAU) is a new type of radio terminal that allows you to make and receive telephone calls via Globalstar's satellite network. The FAU acts as an interface between the Globalstar satellite network and a locally connected telephone. This guide represents the FAU used in a residential application but is indicative of the other application configurations.

A diagram of the Globalstar network is shown below. Your local service provider will be able to advise you on the range of compatible devices

FAU Installation

Typical Network

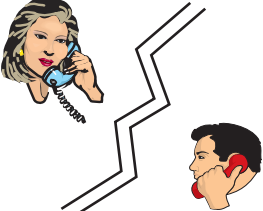

## Safety

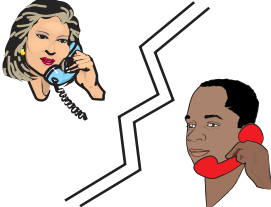

When using your telephone equipment basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons:

- Do not use the telephone near water.
- Avoid using the telephone (other than a cordless type) during an electrical storm.
- Do not use the telephone to report a gas leak in the vicinity of the leak.
- Do not attempt to modify your FAU installation or remove the FAU from its mounting.
- Use only the power supply provided by your service provider to power the FAU.

## Making a Call

	<p>Lift telephone receiver.</p>
	<p>Listen for dial tone.</p> <p><i>Note: If a busy tone is heard try again later.</i></p>
 <p>01234 567890 #</p> 	<p>Dial the number required and finish with the # key.</p> <p><i>Note: If an engaged tone is heard try again later.</i></p>
	<p>Make call.</p>
 <p>END</p>	<p>Hang up receiver to end call.</p>

## Receiving an Incoming Call

	<p>Lift telephone receiver.</p>
	<p>Talk to caller</p>
 <p>END</p>	<p>Hang up receiver to end call.</p>

## Do's and Don'ts

The following tips will help you find simple faults in your telephone system.

- Do wait to hear dial tone before dialling a telephone number.
- Do consider waiting a few minutes to make your telephone call if the line is busy.
- Do consult your local service provider/operator if you want to connect an extension telephone to the FAU
- Do follow the procedure below if the telephone line appears not to be working:
  - check that the power to the FAU is ON.
  - check that the telephone is properly plugged into the socket.
  - if the line is still not working switch the power to the FAU OFF and then switch the power ON again.
  - wait for 1 minute before attempting to make a new telephone call.
  - if the problem persists report it to your local service provider/operator.
- Don't use telephones with the FAU that have not been recommended by your local service provider/operator.
- Don't connect more than three phones to an FAU.
- Don't tamper with the FAU installation or use non-approved power supplies
- Don't allow objects to obstruct the FAU's view of the sky.
