Re: Certification for Strattec Security Corporation MP FlipKey
IC: 5461A-1270254

If necessary, we have enclosed application materials for certification of Strattec Security Corporation MP FlipKey. We tested it and found it to comply with ISED RSS-210/GENe.

Current Variants:

There are four variants of the EUT that differ only in the number of surface mount switches deployed on the PCB and the silkscreen labels on the housing buttons. Part Number 5XK74TRMAA has only two SMT switches populated, part number 5XK75TRMAA and 5XK76TRMAA have three SMT switches populated, and part number 5XK77TRMAA employs the full 4 SMT push buttons.

History:

Original Grant: Mar, 2016; FCC ID: OHT1270254; IC: 5461A-1270254, Models: 5XK74TRMAA, 5XK75TRMAA, 5XK76TRMAA, 5XK77TRMAA.

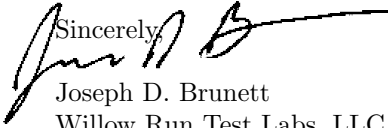

Changes Made:

A Class II permissive change of the device in question is requested. The manufacturer has elected to decreased the fundamental output power software setting of the device by 1.0 dB to better ensure compliance of harmonic emissions on all manufactured samples. The original output power software setting resulted in a 9th harmonic emission that was very close to the regulatory limit.

Action Taken:

The EUT series with the decreased output power setting has been fully retested demonstrating improved compliance margin with the regulatory limits.

The changes made qualify as a permissive change for IC (ref. IC RSP-100). If there are any questions regarding the application or testing performed, please contact us at the above address or call (734) 252-9785, or e-mail info@wrtest.com.

Sincerely,

Joseph D. Brunett
