

## **Response to TCB Findings**

1. For occupied bandwidth and conducted spurious (inter-modulation) plots please clarify the input signal to the repeater. Was it modulated light signal into fiber input of the repeater as described on Page 4 of the report.

**Yes, it was a modulated light signal into the fiber input of the repeater.**

2. On pages 8-13, please clarify which plots were the input signals to the repeater and which were the outputs from the repeater.

**Please refer to the input signal plots supplied additionally.**

3. Please specify the DC voltages and currents in the final RF amplifier stage.

**Please refer to component description uploaded.**
