Class II permissive change request for:
FCC ID: OIWIBDBESMR10W40

To Whom It May Concern:

We have GRANT OIWIBDBESMR10W40 for our product
MW-IBDB-ESMR-10W40 which is 15 MHz bandwidth – 806-821 uplink and
851-866 downlink.

We are required to extend the bandwidth to 18 MHz - 806-824 uplink and
851-869 downlink.

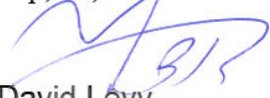

For this purpose we retune the duplexers in the old product and extended the
band as required, and changed the product name to:
MW-IBDB-SMR-10W40-PS8. All other elements, mechanical and electrical
remain the same. This product is replacing the old one

We require Class II permissive change procedure for the new product.

Please contact me if there is any information you may need.

Sincerely,

Sep, 12, 2006

David Levy,
Technical Support Manager
