Modular approval. Output power listed is conducted. This device may only be used in Cisco Access Point with specific antennas as documented in this filing. Co-located 802.11/a optional transmitter operating conditions with FCC ID:LDK102045 have been evaluated as described in this filing - separate equipment certification is needed for other co-location configurations and RF exposure conditions. The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. This device must utilize a BIOS lock mechanism to allow end user installation and ensures use only with hosts as specified in the Certification filing. End-Users must be provided with transmitter operation conditions for satisfying RF exposure compliance. This device must be marketed for indoor use only when optional 802.11/a radio is installed.

CE: This device has shown compliance with the conducted emissions limits in 15.107, 15.207, or 18.307 adopted under FCC 02-157 (ET Docket 98-80). The device may be marketed after July 11, 2005, and is not affected by the 15.37(j) or 18.123 transition provisions.
