Regarding FCC Class II Permissive Change for FCC ID: OJM900MCA

Dear CETCB,

We would like to request a Class II permissive change for FCC ID: OJM900MCA.

Major Changes filed under this application are:

1. Adding RF exposure calculation (SAR exclusion) for "handheld" device classification (devices operated with minimum 5mm separation distance from the human body)

This is a documentation update only and does not affect RF parameters such as output power, frequencies and modulations supported.

If you have any questions or need additional information, please feel free to give me a call at (541) 471-6256

Sincerely,

A handwritten signature in blue ink, appearing to read "Shawn Hogan". It is written in a cursive, flowing style with a horizontal line underneath.

Shawn Hogan  
VP of Engineering and Operations
