

Remote Controller Component Specification

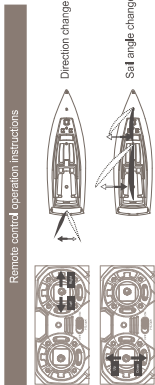

Serial Number	Name	Part Number
01	2.4GHz remote	01
02	Receiver antenna	02
03	Power key	03
04	Channel	04
05	Wind lock	05
06	Wind lock indicator	06
07	Channel	07
08	Wind lock indicator	08
09	Power antenna	09

Safety Protection System

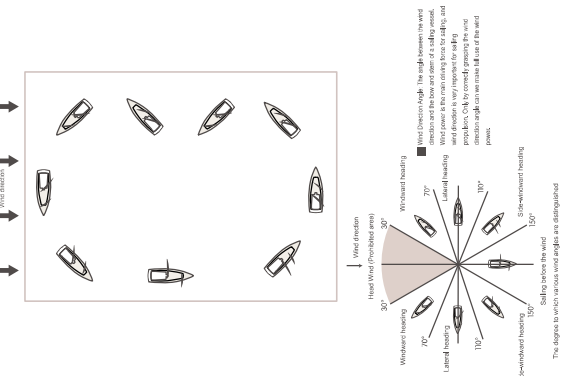

- 1. When the remote controller is powered on, the safety protection system will be activated. If the remote controller is powered on, the safety protection system will be activated. If the remote controller is powered on, the safety protection system will be activated.
- 2. When the remote controller is powered on, the safety protection system will be activated. If the remote controller is powered on, the safety protection system will be activated. If the remote controller is powered on, the safety protection system will be activated.

Method of Signaling Channel Connecting

- 1. When the remote controller is powered on, the safety protection system will be activated. If the remote controller is powered on, the safety protection system will be activated. If the remote controller is powered on, the safety protection system will be activated.
- 2. When the remote controller is powered on, the safety protection system will be activated. If the remote controller is powered on, the safety protection system will be activated. If the remote controller is powered on, the safety protection system will be activated.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's warranty for this equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used according to the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference, you are encouraged to try to correct the interference by one or more of the following measures:
 -Reorient or relocate the receiving antenna.
 -Increase the separation between the equipment and receiver.
 -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 -Consult the dealer or an experienced radio/TV technician for help.

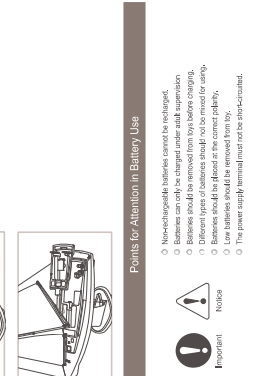

Announcements

- 1. The model is suitable for people 14 years and up. We suggest all those who are 14 years old or over to use it.
- 2. If it is necessary to sail for the water where someone is swimming, otherwise you may hurt someone.
- 3. Once the transmitter and receiver are powered on, confirm the two are communicating and the controls are operating appropriately.
- 4. Turn on the remote control before each voyage when it is on the power supply of the receiver.
- 5. Before playing, please turn on the remote control light and turn on the power of the receiver.
- 6. When there is water in the hull, pour the water out.
- 7. If the boat is difficult to turn, charge the battery.
- 8. When the model is damaged to a certain extent and cannot be repaired, do not continue to use it any more.

Install battery

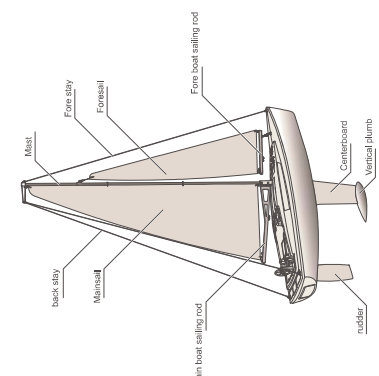

- 1. Installation of remote control battery: Please insert 4 x AA batteries into the battery compartment in the correct positive and negative direction and cover the battery cover.
- 2. Lithium Battery Charging: Let the charging cable in the lower right corner of the back of the remote controller. Plug the other end of the cable into the remote controller's USB port. When the indicator light is lit, the 2x lithium battery is charged. Disconnect from the controller compartment.
- 3. Installation: 1. Insert the lithium battery into the back of the controller. 2. Secure the battery with tape in the back compartment and replace the back.

Points for Attention in Battery Use

- 1. Please do not use the battery for other purposes.
- 2. Batteries can catch fire and explode under certain circumstances.
- 3. Different types of batteries should not be mixed for charging.
- 4. Batteries should be placed in the correct polarity.
- 5. The power supply terminal must not be short-circuited.

Recognition of Sailing Parts

Attention Before Playing

- 1. To avoid model runaway, do not navigate over the water surface.
- 2. Do not navigate in lightning, snow or winds.
- 3. If the model loses power on the surface, please wait patiently and don't try to swim into the water to pick up the boat.
