RE: Thales Communications, Inc.

Model name: Liberty

FCC ID: OKC-4102023501

Manufacturer's Attestation

To Whom It May Concern:

This maximum power attestation from Thales Communications is in regard to the Liberty, FCC ID: OKC-4102023501, portable hand-held radio transceiver.

Thales attests that the conducted power levels used for SAR testing were the maximum power levels Liberty will output in each frequency band.

The maximum conducted power for SAR testing was:

1. VHF: 5.2 W
2. UHF: 5.3 W
3. 700 MHz: 2.6 W
4. 800 MHz: 3.1 W

We will ensure these levels do not exceed limits 1-4 above by factory calibration of the radio.

Thank you,

Kennedy A. Appley
Director of Contracts
