

### Front Panel... FCC ID: OKRMX800CD

The MX800 standard front panel is illustrated below.

The following table explains the functions of the front panel LEDs which indicate the status of the MX800 in real time.

| LED   | FUNCTION   |
|-------|--|
| POWER | Indicates the power supply voltage is within software selectable limits.     |
| RX    | A signal is being received by the receiver or the receivers squelch is open. |
| TX    | The transmitter is transmitting RF power.                                    |
| CTCSS | A valid Continuous Tone Coded Squelch Signal has been detected.              |
| AUX   | Aux function is selected or the PLL is unlocked.                             |
| ALARM | A general alarm condition exists.  |
