RE: FCC ID: ON5HRSENSORC_ATCB005366
Attention: Stephen Guo

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that N/A is not acceptable for radiated emissions testing. Please note that even if the radiated spurious emissions are greater than 20dB below the limits the FCC and ANSI C63.4 section 10.1.8.2 has stated that you must still report at least 6 readings for a part 15 device even if these are noise floor readings at the harmonics of the fundamental. Please provide a corrected test report in line with the requirements of ANSI C63.4 and the FCC showing at least 6 readings for radiated spurious emissions.
2. In regards to item 1 above, please also include the radiated emissions 6 highest readings in the IC report.
3. Please note that it is not clear from the FCC ID label photo where exactly the FCC ID is to be placed. Please show where this is in relation to the device as a whole. Please also note that the FCC ID label CANNOT be on a removable part of the device.
4. Please clearly show where in the manual the non modification and 2-condition statement required by the FCC are located.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
