

1. Please note that N/A is not acceptable for radiated emissions testing. Please note that even if the radiated spurious emissions are greater than 20dB below the limits the FCC and ANSI C63.4 section 10.1.8.2 has stated that you must still report at least 6 readings for a part 15 device even if these are noise floor readings at the harmonics of the fundamental. Please provide a corrected test report in line with the requirements of ANSI C63.4 and the FCC showing at least 6 readings for radiated spurious emissions.

The modified FCC test report has been uploaded to website.

2. In regards to item 1 above, please also include the radiated emissions 6 highest readings in the IC report.

The modified IC test report has been uploaded to website.

3. Please note that it is not clear from the FCC ID label photo where exactly the FCC ID is to be placed. Please show where this is in relation to the device as a whole. Please also note that the FCC ID label CANNOT be on a removable part of the device.

The ID is to be placed in the middle of rear side of strap. It is not a removable part. The modified label location has been uploaded to website.

4. Please clearly show where in the manual the non modification and 2-condition statement required by the FCC are located.

Please refer to the page 2 of the <<User Manual-V2C-2>>

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Modifications

The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by CatEye Co., Ltd. may void the user's authority to operate the equipment.
